ALLEN, MARY BELLE. The dynamic nature of thermophily, 205

ALLFREY, V. G. See DALY, ALLFREY, and MIRSKY, 497

ALLISON, JEAN. See HUMOLLER, GRISWOLD, and MCINTYRE, 723

ARNOLD, WILLIAM, and OPPENHEIMER, J. R. Internal conversion in the photosynthetic mechanism of blue-green algae, 423

BARNETT, SHIRLEY R. See DOUNCE, TISHKOFF, BARNETT, and FREER, 629

BARRON, E. S. GUZMAN, and FLOOD, VERONICA. Studies on the mechanism of action of ionizing radiations. VI. The oxidation of thiols by ionizing radiations, 229

BLINKS, L. R. See HAXO and BLINKS, 389

BLUM, HAROLD F., and PRICE, JUDITH P. Delay of cleavage of the *Arbacia* egg by ultraviolet radiation, 285

— and —. Time relationships in the cleavage of the normal fertilized egg of *Arbacia punctulata*, 305

BOWEN, WILLIAM J. See LAKI, BOWEN, and CLARK, 437

BUEDING, ERNEST. Carbohydrate metabolism of *Schistosoma mansoni*, 475

CHADWICK, L. E. See DETHIER and CHADWICK, 589

CHASE, AURIN M. Studies on cell enzyme systems. IV. The kinetics of heat inactivation of *Cypridina* luciferase, 535

CLARK, ARIEL. See LAKI, BOWEN, and CLARK, 437

CLOWES, G. H. A., KELTCH, A. K., STRITTMATTER, C. F., and WALTERS, C. P. Action of nitro- and halophenols upon oxygen consumption and phosphorylation by a cell-free particulate system from *Arbacia* eggs, 555

—. See KELTCH, STRITTMATTER, WALTERS, and CLOWES, 547

COBURE, ASPASCIA. See HESS and COBURE, 511

DALY, M. M., ALLFREY, V. G., and MIRSKY, A. E. Purine and pyrimidine contents of some desoxypentose nucleic acids, 497

DETHIER, V. G., and CHADWICK, L. E. An analysis of the relationship between solubility and stimulating effect in tarsal chemoreception, 589

DOUNCE, ALEXANDER L., TISHKOFF, GARSON H., BARNETT, SHIRLEY R., and FREER, RICHARD M. Free amino acids and nucleic acid content of cell nuclei isolated by a modification of Behrens' technique, 629

EDWARDS, GEORGE A. See NICKERSON and EDWARDS, 41

FENN, WALLACE O., and GERSCHMAN, REBECA. The loss of potassium from frog nerves in anoxia and other conditions, 195

FLOOD, VERONICA. See BARRON and FLOOD, 229

FONG, J., and KRUEGER, A. P. The lytic action of tyrothricin and its derivatives on *Staphylococcus aureus*, 311

FOSTER, RUTH A. C., JOHNSON,

FRANK H., and MILLER, VIRGINIA K. The influence of hydrostatic pressure and urethane on the thermal inactivation of bacteriophage, 1

FREER, RICHARD M. See DOUNCE, TISHKOFF, BARNETT, and FREER, 629

GASSER, HERBERT S. Unmedullated fibers originating in dorsal root ganglia, 651

GERSCHMAN, REBECA. See FENN and GERSCHMAN, 195

GRISWOLD, BARBARA. See HUMOLLER, GRISWOLD, and MCINTYRE, 723

GROB, DAVID. Proteolytic enzymes. III. Further studies on protein, polypeptide, and other inhibitors of serum proteinase, leucoproteinase, trypsin, and papain, 103

HASTINGS, A. BAIRD. See RAKER, TAYLOR, WELLER, and HASTINGS, 691

HAXO, F. T., and BLINKS, L. R. Photosynthetic action spectra of marine algae, 389

HESS, EUGENE L., and COBURE, ASPASCIA. The intrinsic viscosity of mixed protein systems, including studies of plasma and serum, 511

HULL, WAYNE, and KIRK, PAUL L. Tissue culture studies. II. The relationship of nucleic acid increase to the growth of cells *in vitro*, 327

— and —. III. The relationship of incorporation of radioactive phosphorus in nucleic acid to the growth of cells *in vitro*, 335

— and —. IV. Growth of tissue *in vitro* as related to the direct measurement of $P^{32}$ uptake, 343

—. See SIGNOROTTI, HULL, and KIRK, 315

HUMOLLER, FRED L., GRISWOLD, BARBARA, and MCINTYRE, A. R. Effect of neurotomy on the inorganic cation content of skeletal muscle, 723

JOHNSON, FRANK H. See FOSTER, JOHNSON, and MILLER, 1

SIGNOROTTI, BETTY, HULL, WAYNE,

and KIRK, PAUL L. Tissue culture studies. I. Standardization of techniques for quantitative culturing, 315
SMITH, ARTHUR H. See KLEIBER, SMITH, and RALSTON, 525
STRITTMATTER, C. F. See CLOWES, KELTCH, STRITTMATTER, and WALTERS, 555
—. See KELTCH, STRITTMATTER, WALTERS, and CLOWES, 547

TAYLOR, ISAAC M. See RAKER, TAYLOR, WELLER, and HASTINGS, 691
TISHKOFF, GARSON H. See DOUNCE, TISHKOFF, BARNETT, and FREER, 629

WALTERS, C. P. See CLOWES, KELTCH, STRITTMATTER, and WALTERS, 555
—. See KELTCH, STRITTMATTER, WALTERS, and CLOWES, 547
WELLER, JOHN M. See RAKER, TAYLOR, WELLER, and HASTINGS, 691
WILLIAMS, CARROLL M. See SANBORN and WILLIAMS, 579

# INDEX TO SUBJECTS

ABSORPTION of water by *Nereis limbata* eggs, effects of electrical currents, 379
Acid content, nucleic, of cell nuclei and free amino acids isolated by modification of Behrens' technique, 629
—, desoxyribonucleic, cytochemical determination with Feulgen nucleal reaction, 125
—, desoxyribonucleic, digestion, kinetics of reaction, 363
—, nucleic, increase, and growth of cells *in vitro*, relationship, 327
—, nucleic, radioactive phosphorus incorporation and growth of cells *in vitro*, relationship, 335
—, nucleic, synthesis during bacteriophage, formation in *Staphylococcus muscae* cultures, 17
Acids, amino, free, and nucleic acid content of cell nuclei isolated by modification of Behrens' technique, 629
—, desoxyribonucleic, purine and pyrimidine contents, 497
—, nucleic, staining with methyl green–pyronin, 243
—, nucleic, stoichiometry of reaction of methyl green–pyronin, 265
Actin, polymerization, and adenosinetriphosphate, 437
Adenosinetriphosphate and polymerization of actin, 437
Alcohol, ethyl, higher permeability in *Nitella* for water than for, 275
Algae, blue-green, photosynthetic mechanism, internal conversion in, 423
—, marine, photosynthetic action spectra, 389
Amino acids, free, and nucleic acid content of cell nuclei isolated by modification of Behrens' technique, 629
Anoxia and other conditions, potassium loss from frog nerves in, 195
*Arbacia* egg cleavage, delay by ultraviolet radiation, 285
— eggs, action of nitro- and halophenols upon oxygen consumption and phosphorylation by cell-free particulate system from, 555
— eggs, unfertilized, oxidative phosphorylation by cell-free particulate system from, 547
— *punctulata* egg, fertilized, cleavage, time relationships, 305
Axon, squid giant, electrical phenomena in, 57

BACTERIOPHAGE formation in *Staphylococcus muscae* cultures, nucleic acid synthesis during virus formation, 17
—, thermal inactivation, influence of hydrostatic pressure and urethane, 1
Behrens' technique, modification, free amino acids and nucleic acid content of cell nuclei isolated by, 629
Blood cells, red. *See* Erythrocytes.
—, mammalian, cells and plasma, cation exchange between, methods and application to potassium exchange in human blood, 703
Body fluid, interstitial, and plasma, of cows, mixing rate of phosphate between, 525

CARBOHYDRATE metabolism of *Schistosoma mansoni*, 475

Cation content, inorganic, of skeletal muscle, effect of neurotomy, 723
— exchange between cells and plasma of mammalian blood, methods and application to potassium exchange in human blood, 703
*Cecropia* silkworm, cytochrome system, new component, properties, 579
Cell enzyme systems, kinetics of heat inactivation of *Cypridina* luciferase, 535
— nuclei, nucleic acid content and free amino acids, isolated by modification of Behrens' technique, 629
Cell-free particulate system from *Arbacia* eggs, action of nitro- and halophenols upon oxygen consumption and phosphorylation by, 555
— particulate system from unfertilized *Arbacia* eggs, oxidative phosphorylation, 547
Cells, blood, red. *See* Erythrocytes.
—, growth *in vitro*, and nucleic acid increase, relationship, 327
—, growth *in vitro*, and radioactive phosphorus incorporation in nucleic acid, relationship, 335
— and plasma of mammalian blood, cation exchange between, methods and application to potassium exchange in human blood, 703
Cellulose derivatives, soluble, enzymatic hydrolysis measured by changes in viscosity, 601
Chemistry, cell, determination of desoxyribonucleic acid with Feulgen nucleal reaction, 125
Chemoreception, tarsal, relationship between solubility and stimulating effect, 589
Corpuscles, blood, red. *See* Erythrocytes.
Crab nerve, electrical phenomena in, 75
— nerve, potassium retention, 643
Crystalline desoxyribonuclease, digestion of thymus nucleic acid, kinetics of reaction, 363
— desoxyribonuclease, isolation and general properties, spectrophotometric method for measurement of activity, 349
Cultivation of *Staphylococcus muscae*, bacteriophage formation, nucleic acid synthesis during virus formation, 17
—, tissue, growth *in vitro* related to direct measurement of radioactive phosphorus uptake, 343
—, tissue, nucleic acid increase and growth of cells *in vitro*, relationship, 327
—, tissue, quantitative, standardization of techniques, 315
—, tissue, radioactive phosphorus incorporation in nucleic acid and growth of cells *in vitro*, relationship, 335
*Cypridina* luciferase, heat inactivation, kinetics, 535
Cytochemical determination of desoxyribonucleic acid with Feulgen nucleal reaction, 125
Cytochrome system in *cecropia* silkworm, new component, properties, 579

DESOXYRIBONUCLEASE, crystalline, digestion of thymus nucleic acid, kinetics of reaction, 363
—, crystalline, isolation and general properties, spectrophotometric method for measurement of activity, 349
Desoxyribonucleic acid, cytochemical determination with Feulgen nucleal reaction, 125
— acid, digestion, kinetics of reaction, 363
— acids, purine and pyrimidine contents, 497
Digestion of thymus nucleic acid, kinetics of reaction, 363
Dorsal root ganglia, unmedullated fibers originating in, 651

Drug and ion effects in frog muscle, 729

EGG, *Arbacia*, cleavage delayed by ultraviolet radiation, 285
—, *Arbacia punctulata*, fertilized, cleavage, time relationships, 305
Eggs, *Arbacia*, action of nitro- and halophenols upon oxygen consumption and phosphorylation by cell-free particulate system from, 555
—, *Arbacia*, unfertilized, oxidative phosphorylation by cell-free particulate system from, 547
—, *Nereis limbata*, water absorption, effects of electrical currents, 379
Electrical currents, effects on absorption of water by *Nereis limbata* eggs, 379
— phenomena in nerve, crab, 75
— phenomena in nerve, squid giant axon, 57
Enzymatic hydrolysis of soluble cellulose derivatives measured by changes in viscosity, 601
Enzyme systems, cell, kinetics of heat inactivation of *Cypridina* luciferase, 535
Enzymes, proteolytic, studies on protein, polypeptide, and other inhibitors of serum proteinase, leucoproteinase, trypsin, and papain, 103
Erythrocyte, human, potassium exchange, rate, 691
Erythrocytes, human, accumulation of potassium by, 745

FERTILIZED *Arbacia punctulata* egg, cleavage, time relationships, 305
Feulgen nucleal reaction in cytochemical determination of desoxyribonucleic acid, 125
Fibers, unmedullated, originating in dorsal root ganglia, 651
Fluid, body, interstitial, and plasma, of cows, mixing rate of phosphate between, 525
Fungi, morphogenesis, physiological bases, respiratory metabolism of dimorphic pathogenic fungi, 41

GANGLIA, dorsal root, unmedullated fibers originating in, 651
Growth of cells *in vitro* and nucleic acid increase, relationship, 327
— of cells *in vitro* and radioactive phosphorus incorporation in nucleic acid, relationship, 335
— of tissue *in vitro* related to direct measurement of radioactive phosphorus uptake, 343

HALOPHENOLS, action upon oxygen consumption and phosphorylation by cell-free particulate system from *Arbacia* eggs, 555
Heat inactivation of *Cypridina* luciferase, kinetics, 535
Hemolysis, partial, of hypotonic systems, tonicity-volume relations, 177
Hydrolysis, enzymatic, of soluble cellulose derivatives, measured by changes in viscosity, 601
Hydrostatic pressure and urethane, influence on thermal inactivation of bacteriophage, 1
Hypotonic systems, partially hemolyzed, tonicity-volume relations, 177

ION and drug effects in frog muscle, 729
Ionizing radiations, mechanism of action, oxidation of thiols by, 229

KINETICS of digestion of thymus nucleic acid, 363
— of heat inactivation of *Cypridina* luciferase, 535

LEUCOPROTEINASE, serum proteinase, trypsin, and papain, studies on protein, polypeptide, and other inhibitors of, 103
Light, ultraviolet, and photosensitized inactivation of tobacco mosaic virus, 215
Luciferase, *Cypridina*, heat inactivation, kinetics, 535
Lytic action of tyrothricin and derivatives on *Staphylococcus aureus*, 311

MAMMALIAN blood, cells and plasma, cation exchange between, methods and application to potassium exchange in human blood, 703
Man, blood, potassium exchange, methods and application of cation exchange between cells and plasma of mammalian blood to, 703
—, erythrocyte, potassium exchange, rate, 691
—, red cells, accumulation of potassium by, 745
Marine algae, photosynthetic action spectra, 389
Metabolism, carbohydrate, of *Schistosoma mansoni*, 475
—, respiratory, of dimorphic pathogenic fungi, 41
Methyl green–pyronin in staining of nucleic acids, 243
— green–pyronin, stoichiometry of reaction with nucleic acids, 265
Morphogenesis in fungi, physiological bases, respiratory metabolism of dimorphic pathogenic fungi, 41
Mosaic virus, tobacco, mutation, 171
— virus, tobacco, solutions, two-phase formation, and problem of long-range forces, 445
— virus, tobacco, ultraviolet light and photosensitized inactivation, 215
Muscle, frog, drug and ion effects, 729
Muscle, sartorius, frog, frozen, rigor resulting from thawing of, 563
—, skeletal, inorganic cation content, effect of neurotomy, 723
Mutation of tobacco mosaic virus, 171

NEREIS *limbata* eggs, water absorption, effects of electrical currents, 379
Nerve, crab, electrical phenomena in, 75
—, crab, potassium retention, 643
—, squid giant axon, electrical phenomena in, 57
Nerves, frog, potassium loss in anoxia and other conditions, 195
Neurotomy, effect on inorganic cation content of skeletal muscle, 723
*Nitella*, higher permeability for water than for ethyl alcohol, 275
Nitrophenols, action upon oxygen consumption and phosphorylation by cell-free particulate system from *Arbacia* eggs, 555
Nuclease, desoxyribo-, crystalline, digestion of thymus nucleic acid, kinetics of reaction, 363
—, desoxyribo-, crystalline, isolation and general properties, spectrophotometric method for measurement of activity, 349
Nuclei, cell, nucleic acid content and free amino acids, isolated by modification of Behrens' technique, 629
Nucleic acid content of cell nuclei and free amino acids isolated by modification of Behrens' technique, 629
— acid, desoxyribo-, cytochemical determination with Feulgen nucleal reaction, 125
— acid, desoxyribo-, digestion, kinetics of reaction, 363
— acid increase and growth of cells *in vitro*, relationship, 327
— acid, radioactive phosphorus in-

corporation and growth of cells *in vitro*, relationship, 335
Nucleic acid synthesis during bacteriophage formation in *Staphylococcus muscae* cultures, 17
— acids, desoxyribo-, purine and pyrimidine contents, 497
— acids, staining with methyl green–pyronin, 243
— acids, stoichiometry of reaction of methyl green–pyronin, 265
Nucleus, Feulgen reaction, cytochemical determination of desoxyribonucleic acid, 125

OXIDATION of thiols by ionizing radiations, mechanism of action, 229
Oxidative phosphorylation by cell-free particulate system from unfertilized *Arbacia* eggs, 547
Oxygen consumption and phosphorylation by cell-free particulate system from *Arbacia* eggs, action of nitro- and halophenols upon, 555

PAPAIN, serum proteinase, leucoproteinase, and trypsin, studies on protein, polypeptide, and other inhibitors of, 103
Pathogenic fungi, dimorphic, respiratory metabolism, 41
Permeability, higher, for water than for ethyl alcohol, in *Nitella*, 275
Phage. *See* Bacteriophage.
Phenols, nitro- and halo-, action upon oxygen consumption and phosphorylation by cell-free particulate system from *Arbacia* eggs, 555
Phosphate, mixing rate between plasma and interstitial body fluid of cows, 525
Phosphorus, radioactive, incorporation in nucleic acid, and growth of cells *in vitro*, relationship, 335
—, radioactive, uptake, direct measurement, and tissue growth *in vitro*, relationship, 343
Phosphorylation, oxidative, by cell-free particulate system from unfertilized *Arbacia* eggs, 547
— and oxygen consumption by cell-free particulate system from *Arbacia* eggs, action of nitro- and halophenols upon, 555
Photosensitized and ultraviolet light inactivation of tobacco mosaic virus, 215
Photosynthetic action spectra of marine algae, 389
— mechanism of blue-green algae, internal conversion in, 423
Physiological bases of morphogenesis in fungi, respiratory metabolism of dimorphic pathogenic fungi, 41
Plasma and cells of mammalian blood, cation exchange between, methods and application to potassium exchange in human blood, 703
— and interstitial body fluid of cows, mixing rate of phosphate between, 525
— and serum studies, intrinsic viscosity of mixed protein systems, 511
Polymerization of proteins, adenosinetriphosphate and polymerization of actin, 437
Polypeptide, protein, and other inhibitors of serum proteinase, leucoproteinase, trypsin, and papain, 103
Potassium, accumulation by human red cells, 745
— exchange in human blood, methods and application of cation exchange between cells and plasma of mammalian blood to, 703
— exchange of human erythrocyte, rate, 691
— loss from frog nerves in anoxia and other conditions, 195
— retention in crab nerve, 643
Potentiation, post-tetanic, of response in monosynaptic reflex pathways of spinal cord, 147
Pressure, hydrostatic, and urethane,

influence on thermal inactivation of bacteriophage, 1
Protein, polypeptide, and other inhibitors of serum proteinase, leucoproteinase, trypsin, and papain, 103
— systems, mixed, including studies of plasma and serum, intrinsic viscosity, 511
Proteinase, serum, leucoproteinase, trypsin, and papain, studies on protein, polypeptide, and other inhibitors of, 103
Proteins, polymerization, adenosinetriphosphate and polymerization of actin, 437
Proteolytic enzymes, studies on protein, polypeptide, and other inhibitors of serum proteinase, leucoproteinase, trypsin, and papain, 103
Purine and pyrimidine contents of desoxypentose nucleic acids, 497
Pyrimidine and purine contents of desoxypentose nucleic acids, 497
Pyronin-methyl green, in staining of nucleic acids, 243
Pyronin-methyl green, stoichiometry of reaction with nucleic acids, 265

RADIATION, ultraviolet, delay of *Arbacia* egg cleavage by, 285
Radiations, ionizing, mechanism of action, oxidation of thiols by, 229
Radioactive phosphorus incorporation in nucleic acid, and growth of cells *in vitro*, relationship, 335
— phosphorus uptake, direct measurement, and tissue growth *in vitro*, relationship, 343
Reflex pathways, monosynaptic, of spinal cord, post-tetanic potentiation of response, 147
Respiratory metabolism of dimorphic pathogenic fungi, 41
Ribonuclease, desoxy-, crystalline, digestion of thymus nucleic acid, kinetics of reaction, 363
—, desoxy-, crystalline, isolation and general properties, spectrophotometric method for measurement of activity, 349
Ribonucleic acid, desoxy-, cytochemical determination with Feulgen nucleal reaction, 125
— acid, desoxy-, digestion, kinetics of reaction, 363
— acids, desoxy-, purine and pyrimidine contents, 497
Rigor resulting from thawing of frozen frog sartorius muscle, 563
Root ganglia, dorsal, unmedullated fibers originating in, 651

SARTORIUS muscle, frog, frozen, rigor resulting from thawing of, 563
*Schistosoma mansoni*, carbohydrate metabolism, 475
Serum and plasma studies, intrinsic viscosity of mixed protein systems, 511
— proteinase, leucoproteinase, trypsin, and papain, studies on protein, polypeptide, and other inhibitors of, 103
Silkworm, *cecropia*, cytochrome system, new component, properties, 579
Skeletal muscle, inorganic cation content, effect of neurotomy, 723
Solubility and stimulating effect in tarsal chemoreception, relationship, 589
Solutions, tobacco mosaic virus, two-phase formation, and problem of long-range forces, 445
Spectra, photosynthetic action, of marine algae, 389
Spectrophotometric method for measurement of desoxyribonuclease activity, 349
Spinal cord, monosynaptic reflex pathways, post-tetanic potentiation of response, 147

Squid giant axon, electrical phenomena in, 57
Staining of nucleic acids with methyl green–pyronin, 243
*Staphylococcus aureus*, lytic action of tyrothricin and derivatives on, 311
— *muscae* cultures, bacteriophage formation, nucleic acid synthesis during virus formation, 17
Stoichiometry of reaction of methyl green–pyronin with nucleic acids, 265
Synaptic, mono-, reflex pathways of spinal cord, post-tetanic potentiation of response, 147

TETANIC stimulation and post-tetanic potentiation of response in monosynaptic reflex pathways of spinal cord, 147
Thawing of frozen frog sartorius muscle, rigor resulting from, 563
Thermal inactivation of bacteriophage, influence of hydrostatic pressure and urethane, 1
Thermophily, dynamic nature, 205
Thiols, oxidation by ionizing radiations, mechanism of action, 229
Thymus nucleic acid, digestion, kinetics of reaction, 363
Time relationships in cleavage of fertilized *Arbacia punctulata* egg, 305
Tissue culture, growth *in vitro* related to direct measurement of radioactive phosphorus uptake, 343
— culture, nucleic acid increase and growth of cells *in vitro*, relationship, 327
— culture, quantitative, standardization of techniques, 315
— culture, radioactive phosphorus incorporation in nucleic acid, and growth of cells *in vitro*, relationship, 335
Tobacco mosaic virus, mutation, 171
Tobacco mosaic virus solutions, two-phase formation, and problem of long-range forces, 445
— mosaic virus, ultraviolet light and photosensitized inactivation, 215
Tonicity-volume relations in partially hemolyzed hypotonic systems, 177
Triphosphate, adenosine-, and polymerization of actin, 437
Trypsin, serum proteinase, leucoproteinase, and papain, studies on protein, polypeptide, and other inhibitors of, 103
Tyrothricin and derivatives, lytic action on *Staphylococcus aureus*, 311

ULTRAVIOLET light and photosensitized inactivation of tobacco mosaic virus, 215
— radiation, delay of *Arbacia* egg cleavage by, 285
Urethane and hydrostatic pressure, influence on thermal inactivation of bacteriophage, 1

VIRUS, bacteriophage formation in *Staphylococcus muscae* cultures, nucleic acid synthesis, 17
—, tobacco mosaic, mutation, 171
—, tobacco mosaic, solutions, two-phase formation, and problem of long-range forces, 445
—, tobacco mosaic, ultraviolet light and photosensitized inactivation, 215
Viscosity, enzymatic hydrolysis of soluble cellulose derivatives measured by changes in, 601
—, intrinsic, of mixed protein systems, including studies of plasma and serum, 511

WATER absorption by *Nereis limbata* eggs, effects of electrical currents, 379
—, higher permeability in *Nitella* than for ethyl alcohol, 275
